PRESERVING THE SUBSTANCE TO SAVE THE ESSENCE

ABOUT US

RESTAURO Sp. z o.o. Building, painting, and sculpture conservation professionals
Since 1993

We mainly specialize in historic building conservation, repair, modernization, and conversion.
We perform research, develop conservation programs, and deliver condition reports.
Our core team is made up of certified heritage conservators and building engineers with an extensive expertise in working on heritage sites.
Our portfolio comprises projects of considerable scale, complexity, and cultural significance, including historic sacred and secular buildings occupied by many important Church or State institutions.

The Company is a member of Stowarzyszenie Konserwatorów Zabytków (Association of Heritage Conservators).

ABOUT US

SERVICES

STANDARD

Our services include:

– comprehensive building works on historic buildings
– comprehensive conservation and restoration of:

  – statues and architectural stone, stucco and ceramic elements and details
  – metal works
  – wooden works
  – mural painting
  – works of art.

We perform research, develop conservation programs, and deliver condition reports.
We offer advice, consulting and supervision of conservation projects.

We also offer a separate service consisting in the cleaning of historic surfaces with laser radiation.

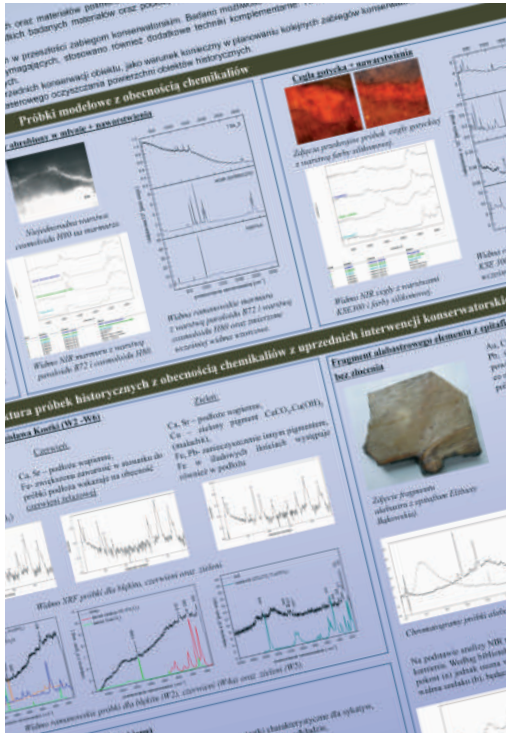
RESEARCH AND SCIENTIFIC COLLABORATION WITH SCIENCE INSTITUTES

RESEARCH AND SCIENTIFIC COLLABORATION WITH SCIENCE INSTITUTES

RESEARCH AND SCIENTIFIC COLLABORATION WITH SCIENCE INSTITUTES

INNOVATIVE ECONOMY OPERATIONAL PROGRAMME
CONTINUOUS COLLABORATION WITH THE SZEWALSKI INSTITUTE OF FLUID-FLOW MACHINERY, POLISH ACADEMY OF SCIENCES, GDAŃSK
Duration: since 2009



Restauro and the Institute entered into a collaboration agreement in order to jointly conduct research and other scientific work.

The largest project realized together focused on examining
the effects of laser cleaning on the surface of previously treated historic objects.

Under the same Innovative Economy Operation Programme 2007-2013, measure 1.4-4.1, Restauro has been **setting up a laboratory for optoelectronic techniques to able to provide innovative conservation services.**
The project is aimed at enabling Restauro to complement its array of treatments with laser cleaning and optical analysis methods applicable to the renovation of historic surfaces.

The decision to set up the laboratory was rooted in complex industrial research and development work conducted in collaboration with the Specialized laboratory for non-destructive testing and optoelectronic techniques, a unit of the Szewalski Institute. Laboratory testing was accompanied by field tests preformed on historic objects with portable analytical apparatus.

As well as carrying out a series of historic surface cleaning efficiency tests, Restauro together with the Institute undertook large-scale cleaning operations, e.g. on architectural stone details of the tower of Ss. Johns' Cathedral in Toruń
and on architectural and sculptural details of the facade of the Visitationist Church in Warsaw.

RESEARCH AND SCIENTIFIC COLLABORATION WITH SCIENCE INSTITUTES

STONECORE INTERNATIONAL PROJECT

Duration 2008-2011

STONECORE
www.stonecore-europe.eu

RESTAURO was one of 12 EU-based research units and companies forming the STONECORE international research consortium.

The STONECORE (Stone Conservation for Refurbishment of Buildings) project was funded under the 7th Framework Programme of the European Commission, Theme 4 – nanosciences, nanotechnologies, materials and new production technologies (grant number 213651).

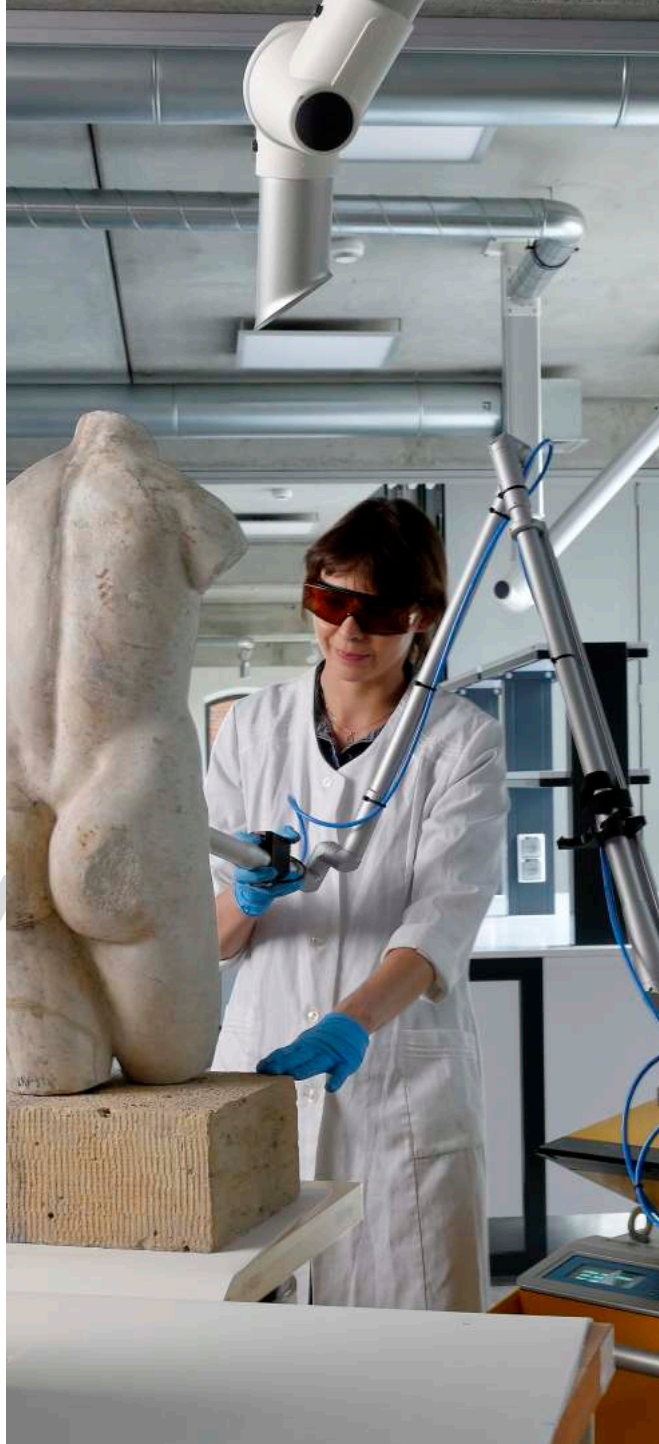
It was aimed at the development of a production technology and at the field application of "nanocalcium", a chemical intended for use in the conservation of mineral substrates, in particular of natural and artificial stones.

Restauro's main role in the project was to examine the practical application of preparations based on colloidal solutions of nanoparticle calcium hydroxide to the conservation of degraded building materials. Apart from laboratory tests, a number of field tests and pilot trials were carried out on historic buildings, e.g. the Cathedral Basilica of St. John the Baptist and St. John the Evangelist in Toruń, the Castle of the Teutonic Order in Malbork, and the Church of St. Joseph of the Visitationists in Warsaw.

At EuroNanoForum 2013 held in Dublin STONECORE was acknowledged as one of the most interesting among 800 EU-funded nanotechnology projects presented and was selected as one of the 11 finalists competing for the Best Project award.

INNOVATIVE LABORATORY FOR LASER TREATMENT OF HERITAGE

INNOVATIVE LABORATORY FOR LASER TREATMENT OF HERITAGE



INNOVATIVE LABORATORY FOR LASER TREATMENT OF HERITAGE

Innovative Laboratory for Laser Treatment of Heritage

The Lab operates as an R&D unit
within Restauro's business structure.

The Lab offers:

- cleaning of heritage and works of art by means of laser ablation,
- non-destructive XRF and complementary tests to identify the composition of pieces of heritage and works of arts,
- non-destructive microscopic and spectrophotometric tests to determine the surface condition and discoloration of pieces of heritage and works of art,
- digitization and 3D modeling of heritage, and
- creation of 3D models and HD panoramas of heritage.

Being portable, both our analytical apparatus and laser systems can be applied in situ, i.e.
in the place where a given item is stored or located or where treatment is being administered.

The Lab can boast top-class laser systems.
Its state-of-the-art analytical tools have been carefully selected in such a way as to enable
the full-cycle monitoring of laser treatment – from preliminary tests to cleaning, to completion.

The establishment of the Laboratory was co-funded under the “Innovative Economy 2007–2013” operational program.

AWARDS AND DISTINCTIONS

We have received a number of awards and distinctions for our accomplishments in heritage conservation and restoration.

LIST GRATULACYJNY
dla
Pani Małgorzaty Musieli
Prezesa Zarządu Firmy Restauro Sp. Z o.o.

Z okazji zdobycia przez Muzeum Pałac Herbsta nagrody głównej w XXV edycji Konkursu na Wnętrze Roku 2013-2014, organizowanego przez Fundację Ulicy Piotrkowskiej oraz zajęcia pierwszego miejsca w kategorii wnętrz poddanych rekonstrukcji historycznej, przekazuję Pani wyrazy uznania za wkład i zaangażowanie w realizację projektu "Modernizacja Rezydencji Księży Młyn (Muzeum Sztuki w Łodzi)". Serdecznie gratuluję także wyróżnienia za opracowanie projektu konserwatorskiego, jakie przyznała Pani kapituła nagrody.

Łódź, 04.03.2015 r.

Urszula Tracz
Zastępca Dyrektora
Muzeum Sztuki w Łodzi
Kierownik projektu
